

Ein paar Mails von unseren Studenten und Lernenden

26/04/2020 (von einer technischen Medizinal-Assistentin im 2. Jahr)

Hi mummy.....

It's my hope that you are doing well and keeping safe. Am also fine and keeping safe too, by strictly following the set rules. Am hoping that the Covid-19 virus pandemic will be over soon, that we may resume school. The schools' closure has now been extended by a month, to help prevent the spread of the deadly virus. Am hoping to go for attachment as soon as it's over, and also sit for my final qualifying examination in the same year. Mum the pandemic is still on and life is becoming very hard. Many companies closed down, and shops as well.....it's not easy to get a small job at the moment. We are just advised to stay home and keep safe. I used the money you offered me to stock some food and buy the basics for survival and it's now over. I really appreciate your support. Am spending the time at home doing some revision because anytime, the pandemic will be over and I will be required to sit for my final examination. My brother is also revising, as I help him capture some topics he never captured at the time he was absent from school, due to lack of school fees. I always help him whenever I can and he is doing very fine. At least he saw some light and he is working smart. May God bless you abundantly mum. I will really appreciate your support that we may purchase some food and cater for the essentials for we have nothing. I greet you warmly mum, and embrace you. Please keep safe, if not for anyone at least for me ☐

Your loving daughter,
Alice.

Dear madam Heidi,

It is my hope you are still healthy as your family is. Here in Kenya the covid 19 situation is still worsening but I thank God we are still healthy. The government has locked down the movement in and out of most counties including Nairobi. To be sincere this has affected many people especially the drivers eg my brother. Lack of job and denial of movement has made it hard to survive, currently am at my brother's place.

I didn't mean to be so stubborn, but please if there is a way you can support me at least get a little food shopping I will highly appreciate.

About school, despite of insisting too much the school has not made any effort on organising online learning. The government has at least organized television session classes for educating students when at home, these sessions are only advantageous for primary school pupils.

Sweet greetings as I expect to hear from you.
KELVIN OTIENDE

Dear Madam,

Unfortunately, due to the recent lockdown announced on Monday by the Government in some parts and arising uncertainties from most of the farmers here, it has been a challenge for me securing a job to do.

Sometimes whatever we are getting is not enough. We usually share it as we save for another day. And to make it enough, we forgoe some meals so that at supper we might all have something to eat.

Thus, any support accorded will be of much help to us and sincerely appreciated.

Thank you and warm regards,
Michael Mbiyu Ngige.

Dear madam,

I hop that you are fine, hopping that you had a wonderful fight, I am also doing well together with my baby, (Hammarskjöld).

but mostly affected by virus which has lead to everything not to work as normal, so far am not doing anything, now that everything has shut due to disease, it is now a big problem to us for our daily bread.

Life has become difficult since working stations has closed till further notice, which we dont know when it may end.

Am following rules and regulation to avoid being taught by diseases; washing hands regularly with soap, since its the affordable.

yours faithfully
Diana muhonja

Dear Swiss mom,

Thank you so much, for sure I cannot express my gratitude to show how thankful I am. Thank you for the assistance, and my mother also expresses her gratitude for your generous aid. About the job, I am still searching, though most of the institutions are closed and the open ones are reluctant to take in new employees in fears of the pandemic. It is my hope all goes well soon and I may get a place to work despite the tough measures the government is putting in place, especially the most current being a curfew. I also pray that all goes well in your country.

Thank you again dear swiss mom. Please take care and stay safe together with your family.

I will occasionally keep in touch with you concerning the progress back here.

Be blessed. your kenyan son Moses
